## ABOUT ME

Self-taught full stack web developer passionate about building clean, scalable web applications with Django, Python, PostgreSQL, and modern fronted tools. Experienced in creating real world projects including RESTful APIs, responsive UIs with bootstrap ad custom CSS. Eager to contribute to a team while delivering reliable, bug-free code that solves problems efficiently.

## SKILLS / TECHNOLOGIES

o Languages: Python, JavaScript, PHP, HTML/CSS
o Frame Works and tools: Django. Django REST Framework (DRF), Bootstrap, GIT.
o Databases: PostgreSQL
o Other: Custom CSS, RESTful APIs, Responsive Design, Debugging and Problem Solving.

## PROJECTS

- Built a Django powered Web3 web app where NFT artists can sell their arts without reveal it's contents, and can be bought by others using Solana!
- Developed a weather checking web app that knows whether using the weather API. For myself.
- Built a mini social media platform using Django as Backend.
- Developed a fully functional real estate website using PHP as Backend. Hosted locally in my machine.
- Etc…

## EDUCATION & CERTIFICATES

- Graduated at Vtech ICT Academy at Enugu, Nigeria. (HTML/CSS, and PHP)
- Self-taught Developer (Python and Django) | ongoing tech lessons. (YouTube videos.)

## OTHERS

- Freelancer/ Volunteer work
- Interests: Football Enthusiast, Music lover, constant thinker.
